

How to Check if a Bot Is Activated

After [creating a bot](#), you have to verify if it is activated. This article shows how you can do this.

To check if the bot is firing and sending alert messages:

1. Navigate to **Bots** on the MSPbots menu and select the bot that you want to verify.
2. Check for successful runs. On the **Detail** section, check under **Recent run history** section. You should see **Succeeded** statuses if the bot was activated.

Hi, hey! It's been 10 minutes since your shift's end time. Make sure to type out when you're done working.				
If you forgot to clock out on time, just type out at [Actual_Out_time] to update your time entry. You can also use the in/out board .	Ready	03/10/2022 19:17 CST		user
Take care!
