

How to Use the Sound Feature of Widgets

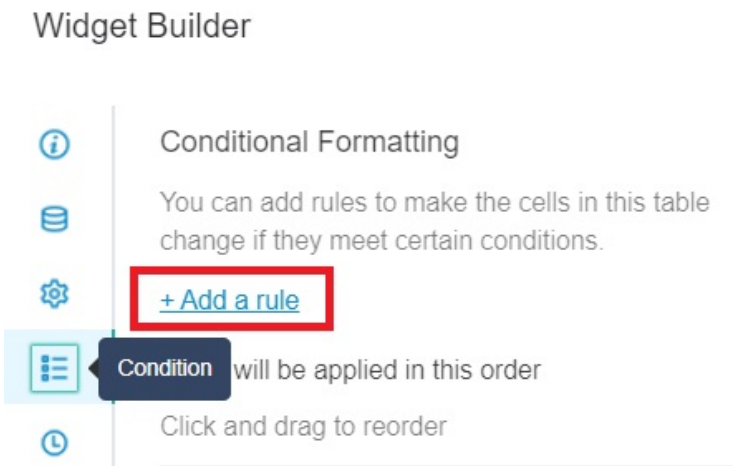

Card widgets have a feature that plays a sound alert when a condition is met. The sound feature is configured and activated on the Widget Builder.

This article shows how to do the following:

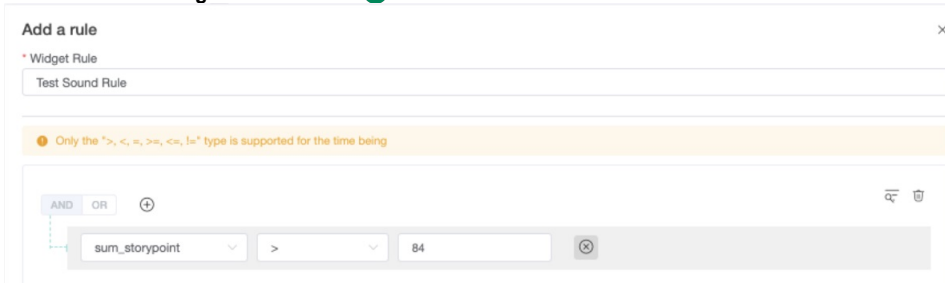

- [Activate or enable the sound alert](#)
- [Disable the sound alert](#)

Activate or enable the sound alert

1. Go to [Widgets](#) on the MSPbots app and open the card widget that needs a sound alert.
2. On the Widget Builder window, click the **Condition** icon, then click the **Add Rule** link.

3. Enter a name for **Widget Rule** and click **+** to add a condition.

4. Tick the **Play Alert Sound** checkbox and select an alert sound from the drop-down list. You may click the speaker icon to hear and test the

The screenshot shows a configuration window for an alert. At the top, there is a checkbox labeled 'Play Alert Sound' which is checked. To its right is a dropdown menu currently displaying 'Alert Sound 1'. A speaker icon is located to the right of the dropdown. Below the dropdown, a list of options is visible: 'Alert Sound 1', 'Alert Sound 2', 'Alert Sound 3', 'Alert Sound 4', 'Alert Sound 5', 'Alert Sound 6', 'Alert Sound 7', and 'Alert Sound 8'. To the left of the dropdown, there is another checkbox labeled 'Repeat the sound in every' which is currently unchecked. To the right of this checkbox is a numeric input field containing the number '5', followed by a '+' button, a '-' button, and the word 'minutes'.

sound.

If you want the sound alert to repeat, tick the checkbox for **Repeat the sound in every** and indicate your preferred alert interval.

This screenshot shows the same configuration window as before, but with the 'Repeat the sound in every' checkbox now checked. The numeric input field still shows '5' minutes. The 'Play Alert Sound' checkbox remains checked, and the dropdown menu still shows 'Alert Sound 4'. An 'Apply' button is visible at the bottom right of the configuration area.

5. Click **Apply** on the Add a rule window, then click **Apply** again on the Widget Builder window.

Disable the sound alert

The sound alert feature is deactivated by removing the checkmark on the **Play Alert Sound** checkbox and clicking **Apply**.

The screenshot shows the configuration window with the 'Play Alert Sound' checkbox now unchecked. The 'Repeat the sound in every' checkbox remains checked with the interval set to 5 minutes. The dropdown menu still shows 'Alert Sound 4'. An 'Apply' button is visible at the bottom right.
