

# N-able RMM Integration Setup

You need to provide the URL and API Token when connecting N-able RMM to MSPbots.

## Perform the following to Connect N-able RMM to MSPbots:

1. Secure the URL and API Token information for your N-able RMM account.
  - a. Log in to your **N-able RMM Dashboard**.
  - b. Click on **Settings** and select **General Settings**.  
[blocked URL](#)
  - c. Click **API**, then click the **Regenerate** button. If you already have an API Key generated, copy the current key.  
[blocked URL](#)
2. Log in to the MSPbots app and navigate to [Integrations](#) on the menu.
3. On the **Integrations** tab, search for **N-able RMM** and click it.
4. Enter the **URL** and **API Token** in the corresponding fields. Refer to the [User Guide for Determining the Server for API Query](#) for the URL you can use.
5. Click **Save And Sync**.

The screenshot shows the 'N-able RMM' integration setup form. It has a header bar with the N-able logo and title. Below the header, there are two input fields: 'URL' and 'API Token'. Both fields have red placeholder text 'Please Enter URL' and 'Please Enter API Token' respectively. A green 'Save And Sync' button is at the bottom left. There are also some small icons in the top right corner of the form area.
