

Jira Server Integration Setup

Perform the following steps to connect Jira Server to MSPbots:

1. Secure the following information for your Jira Server account:
 - Jira URL
 - User Name
 - Password
2. Log in to the MSbots app and navigate to [Integrations](#) on the menu.
3. On the Integrations tab, search for **Jira Server** and click it.
4. Enter the information from Step 1 into the corresponding fields.

The screenshot shows the 'Jira Server' integration setup interface. At the top, there's a header with the Jira logo, the text 'Jira Server', and a status bar indicating 'Last success auth : 10/14/2022 12:38 CDT' and 'Type : PSA'. Below this, there are three input fields, each with a red asterisk indicating a required field: 'Jira Url:', 'User Name:', and 'Password:'. The 'Password:' field has a small eye icon to its right. At the bottom of the form is a green button labeled 'Save And Sync'.

5. Create a separate MSPbots account with read-only permission in Jira. (Optional)
6. Click **Save And Sync**.
