# Cisco Umbrella Integration Setup

To set up your MSPbots integration with Cisco Umbrella:

1. Create the Umbrella API Key and Key Secret. Follow the steps on Cisco's Add Umbrella API Keys page.

   Note and save the API Key and Key Secret right away. For security reasons, Umbrella displays the keys only once, If lost, there is no way to retrieve the keys.

2. Test your connection. If you encounter an error, check if the Cisco Umbrella account you used to log in has the correct credentials.
3. Next, go to the MSPbots app and navigate to **Integrations**.
4. Find **Cisco Umbrella** and click it to open.

5. Enter the **API Key** and **Key Secret**, then click **Save And Sync**.
