Connecting SentinelOne to MSPbots

1. Navigate to **Integrations** on the MSPbots app.

2. Search for **SentinelOne** and click it to open the connection settings.

3. Enter the **Management URL** and **API Token** in the corresponding fields. Refer to the section on [Obtaining the parameters for your SentinelOne integration](#) to get these values.

The screenshot shows the MSPbots Integrations page. The top navigation bar includes the MSPbots logo, a search icon, and links for 'Refer and Earn', 'Client: mspbots.ai', 'Forum', 'KB', 'Help Center', and 'Request New Feature'. The main content area is titled 'Integrations' and features a sidebar with various icons. The main panel has a search bar with 'API' and 'SentinelOne' filters. Below this, there are sections for 'Connected', 'Waiting to be Connected', and 'Other Available Integrations'. The 'Other Available Integrations' section is expanded, showing the SentinelOne integration form. The form has two input fields: 'Management URL' with a placeholder 'Please enter Email' and 'API Token' with a placeholder 'Please Enter Password'. A red rectangle highlights these two fields. At the bottom of the form is a green 'Save And Sync' button.

4. Click **Save and Sync**.

This screenshot is identical to the previous one, showing the MSPbots Integrations page with the SentinelOne configuration form. The 'Save And Sync' button at the bottom of the form is now highlighted with a red rectangle.

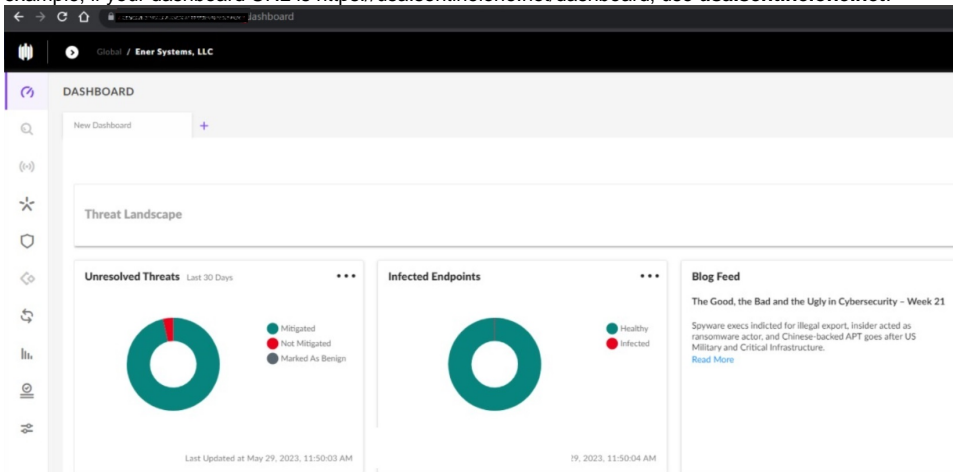

The page displays the success messages below indicating that MSPbots has successfully connected to SentinelOne.

The screenshot shows the MSPbots Integrations page after a successful connection. A green success message is displayed at the top: 'Save setting success. Start sync data, this may take some time, Please check the results later.' Below this, a green 'success' button is visible. The main content area shows the 'Connected' section expanded, displaying the SentinelOne integration status as 'Success' with a green checkmark. Below the status, it shows 'Last success auth: 05/31/2023 03:44 CDT'. The 'Waiting to be Connected' and 'Other Available Integrations' sections are also visible.

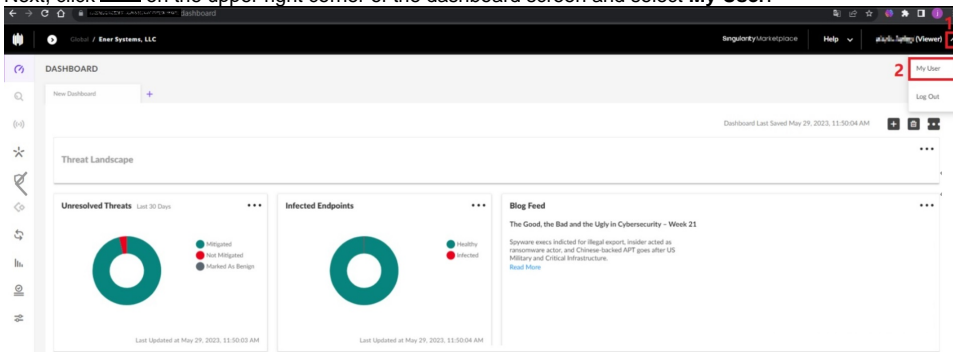

Obtaining the parameters for your SentinelOne integration

1. Log in to **SentinelOne**.

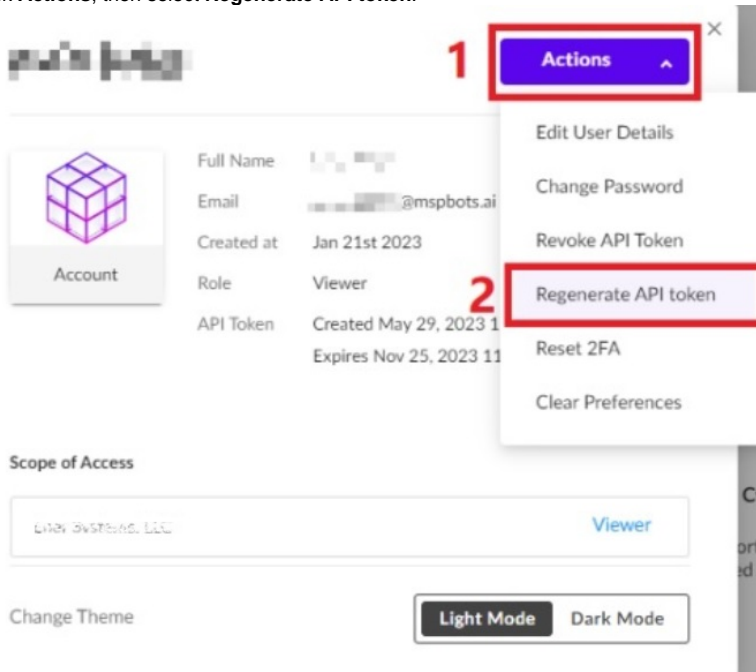

2. After login, check the URL of your SentinelOne dashboard and use that as the **Management URL** when connecting MSPbots to SentinelOne. For example, if your dashboard URL is <https://usa.sentinelone.net/dashboard>, use **usa.sentinelone.net**.

3. Next, click  on the upper right corner of the dashboard screen and select **My User**.

4. Click **Actions**, then select **Regenerate API token**.

5. Finally, click the **Copy API Token** button in the API Token window. Paste this on the API Token field when connecting MSPbots to SentinelOne.
