

Unable to View or Download Attachments in the Help Center

MSPbots clients have the option to view or download attachments in the requests and tickets they submit via the Help Center. When viewing or downloading attachments fails, clients should check if they have an active account. This article is a guide on how to successfully create a Help Center account, access attachments to tickets, and submit requests to MSPbots.

Issue Description

Some MSPbots users encountered an issue in the Help Center where they could not view or download attachments like CSV and PDF files. The page prompted for a login but clients could not log in using their MSPbots accounts. Password reset and log in using the new password did not fix the issue.

The possible cause of the issue is that these users could not log in because they do not have a registered account with the Help Center yet.

Pick an account

Selected user account does not exist in tenant 'MSPbots.ai' and cannot access the application 'https://support.mspbots.ai/plugins/servlet/samlssso' in that tenant. The account needs to be added as an external user in the tenant first. Please use a different account.

Applications and Permissions

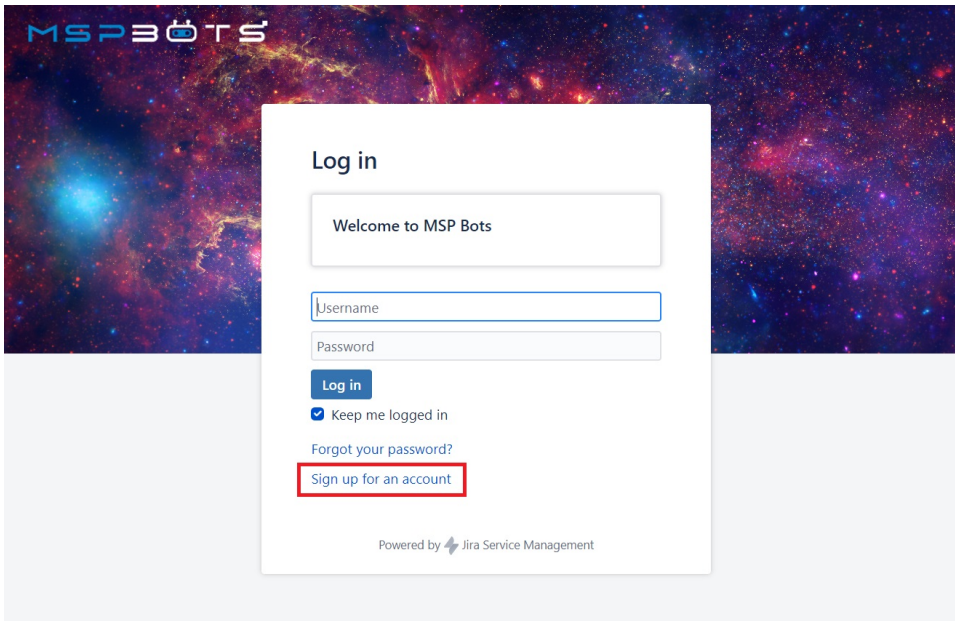

The Help Center does not have permission restrictions and is available for any user who wants to submit a support request to MSPbots. Existing MSPbots users and users without an MSPbots account should be able to access the page after signing up.

Resolution

You must first create an account in the Help Center before you can successfully log in and submit a support request, users

1. Sign up for an account in the Help Center

1. Enter MSPbots' [Help Center](#) and click **Sign up for an account**. If you already have an account, proceed to Step 4.

2. When the **Sign up for an account** pop-up window opens, type your **Email** address and click **Sign Up**.

Welcome! You can raise a Support request from the options provided.

Browse all

You can also use the search bar or the navigation menu to select a category for your request. For example, if you need technical support with creating a bot, select **Bot** > **Create a Bot**.

Alternatively, you can type **Create a Bot** in the Search box to find the corresponding request form.

3. Next, fill in the following fields to create a support request.
 - **Summary (Required)** - Enter a concise summary or title for your support request.
 - **Description** - Provide a detailed description of your request and the support you need.

- **Attachment** - Attach relevant files or documents related to your request.
