

Creating a Pie Chart Widget

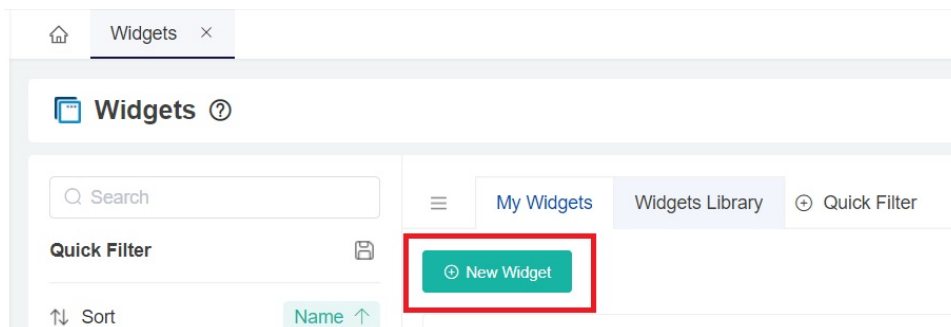

This article shows how to create a pie chart widget that shows the total number of tickets per issue type in the last 7 days. It applies to MSPbots users with an Autotask integration.

How to Create a Pie Chart Widget

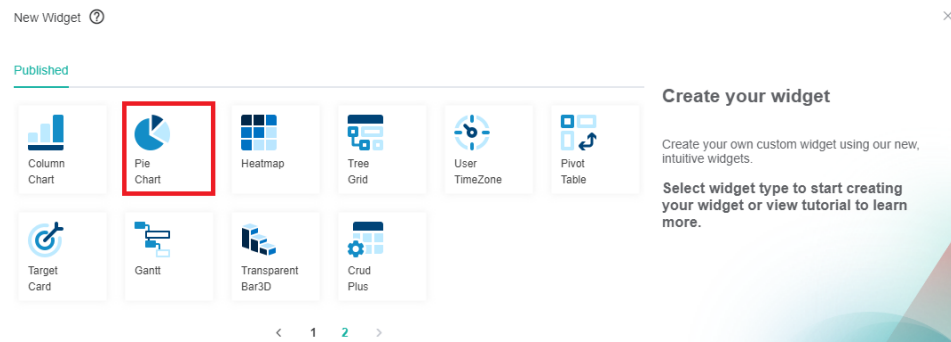

1. Navigate to [Widgets](#) on the MSPbots app menu.

2. Under My Widgets, click **New Widget**.

3. Select the **Pie Chart** widget type on the New Widget window.

4. When the Widget Builder window opens, go to the **Basic Setting** tab. Provide the following and click **Apply**:

- **Name** - Give the widget a name.
- **Description** - Give the widget a short description.
- **Role** - Select the roles you want to give access to.

i

Basic Setting

Name

(Sample) Tickets Per Issue Type

Description

This pie chart shows the total number of tickets per issue type in the last 7 days.

6. On the Dataset window,

- Select the Dataset containing the information you want to use.
- Give a **Name** for the Datasource (optional).

Dataset:

Autotask / Autotask Ticket Statistics

Show datasource name as

- For **Columns Display**,
 - Using the Column Name dropdown, select the field you want to show in the drill through. Click the **+** button to add more rows.

- ii. Give an **Alias** and select a **Business Type** for each.

Columns Display:

Select All Clear All

Column Name	Alias	Business Type	
company_name	Company	Text	
ticket_number	Ticket Number	Hyperlinks	
issue_type	Type	Text	
sub_issue_type	Sub-type	Text	
create_date	Date Created	Date Time	
completed_date	Date Completed	Date Time	

- d. For **Filter**,

- i. Click the **+** button and choose between **Add Condition** and **Add Group**.
- ii. Add all the fields you want to be filtered.
- iii. Set a **condition/logic** for each field using the next 2 dropdowns. For a guide on each options, refer to: [What Conditions are Available for Creating Widgets?](#)
- iv. Select a logical operator for the filter group (AND or OR).

Filter:

AND OR +

h. Click **Save**.

7. Go to **Config tab**.

- Select the **Dimension** for X-axis. This will determine the grouping used to partition the pie.
- Set the **Measure** for Y-axis. This will be used for the values of each partition.
- (optional) For Sub X-axis, another measure can be added to further divide the pie chart.
- For Measure Text, select the same **Measure** used for Y-axis.
- (optional) Add a Pie Chart Title.

f. (optional) Add a Part Name.

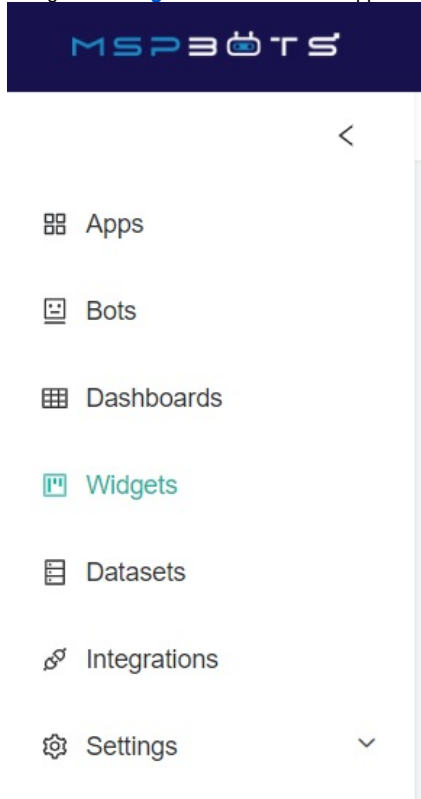

[illegible]

8. Click **Apply**. This will show a preview of the pie chart created.

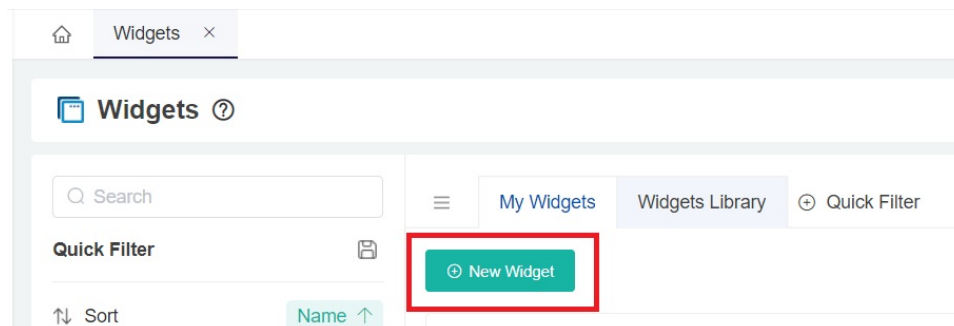

Example: How to Create a Pie Chart Widget that shows the total number of tickets per issue type in the last 7 days

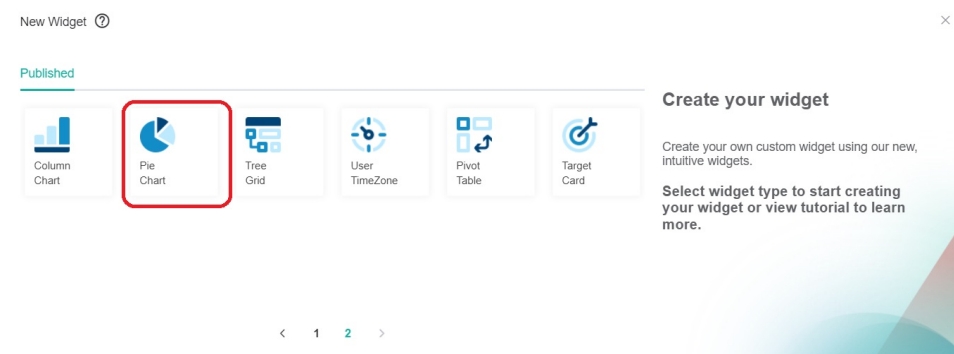

1. Navigate to **Widgets** on the MSPbots app menu.

2. Under My Widgets, click **New Widget**.

3. Select the **Pie Chart** widget type on the New Widget window.

4. When the Widget Builder window opens, go to **Basic Setting** tab. Provide the following and click **Apply**:
 - **Name** - Tickets Per Issue Type
 - **Description** - This pie chart shows the total number of tickets per issue type in the last 7 days.

- **Role** - Admin and User

g. Click **Save**.

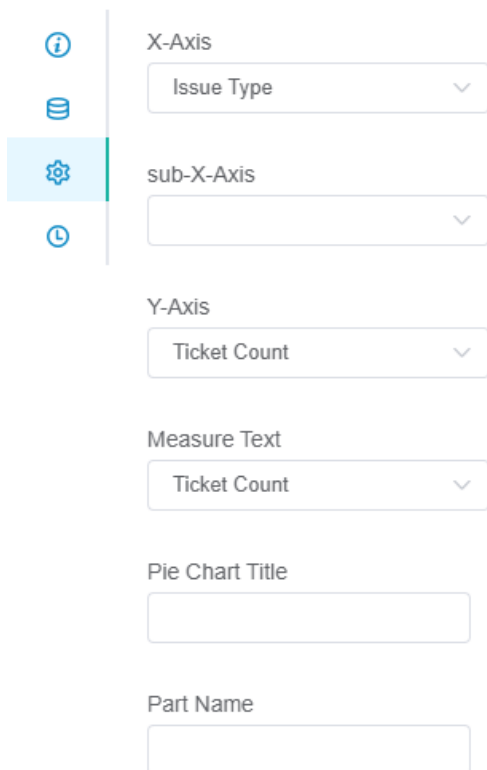

7. On the **Dataset** tab, for Order By, click the  button and select Ticket Count.

The screenshot shows the 'Dataset' tab configuration interface. On the left is a vertical sidebar with four icons: an information icon (i), a database icon, a gear icon (selected), and a clock icon. The main area is titled 'Data Source' and contains a light blue box labeled 'Autotask Ticket Statistics' with a three-dot menu to its right. Below this is another light blue box with a large plus sign. Underneath is the 'Order By' section, which features a green pill-shaped button with an upward arrow, the text 'Ticket Count', and a close 'x' button. To the right of this button is a circular button with a plus sign. Below 'Order By' is the 'Row Limit' section, which includes a text input field containing 'All Data' and a dropdown arrow on the right. At the bottom left of the main area is a small icon of a pie chart with a magnifying glass.

8. Go to **Config** tab.

- Select **Issue Type** for X-axis.
- Select **Ticket Count** for Y-axis.
- Select **Ticket Count** for Measure Text.

The screenshot shows the 'Config' tab configuration interface. The left sidebar is identical to the previous one, but the gear icon is now selected. The main area contains several configuration fields: 'X-Axis' with a dropdown menu showing 'Issue Type'; 'sub-X-Axis' with an empty dropdown menu; 'Y-Axis' with a dropdown menu showing 'Ticket Count'; 'Measure Text' with a dropdown menu showing 'Ticket Count'; 'Pie Chart Title' with an empty text input field; and 'Part Name' with an empty text input field.

9. Click **Apply**. This will show a preview of the pie chart created.
