

Widgets

- 1. Widgets library
- 2. Type of the Widgets
 - 2.1. eCharts Widget library Demo:
- 3. Creating new widgets

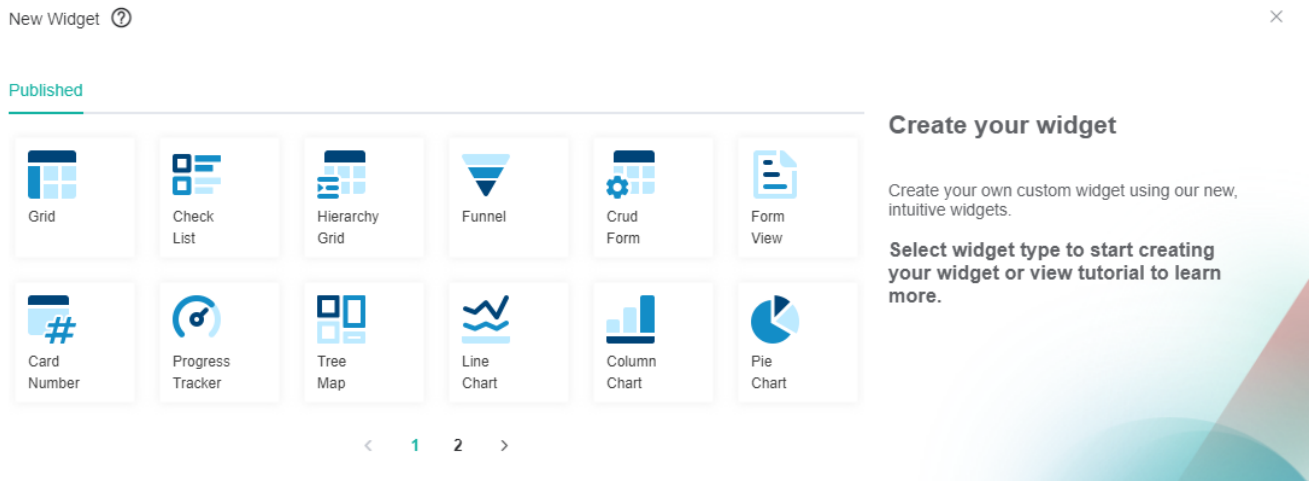

1. Widgets library

MSPbots has more than 1000 pre-built widgets for all integrations, more widgets are being developed every day.

2. Type of the Widgets

Here are the types of widgets that you can create right now.

Published

Tree
GridUser
TimezoneTarget
Card

Create your widget

Create your own custom widget using our new, intuitive widgets.

Select widget type to start creating your widget or view tutorial to learn more.

2.1. eCharts Widget library Demo:

If current prebuilt widgets types are not enough, please visit our library [here](#), and send an email to us about your use case, which one in the eChart that you want, we typically can release the new version in 2-3 days once it passes the use case validation.

3. Creating new widgets
