

PRTG Integration Setup

You need API info to connect PRTG Network Monitor to MSPbots.

To set up the PRTG integration:

1. Secure the following API information for PRTG:
 - a. Server URL
 - b. User name
 - c. Pass hash
2. Log in to the MSPbots app and go to [Integrations](#).
3. Search for **PRTG Network Monitor** and click it.
4. Enter the **Server URL**, **User Name**, and **Pass Hash** in the corresponding fields.

The screenshot shows a web form titled "PRTG Network Monitor" with a sidebar on the left containing the MSPbots logo. The form contains four input fields, each with a red border and a red asterisk indicating a required field. The fields are labeled "Server Url:", "User Name:", and "Pass Hash:", each followed by a placeholder text "Please Enter [field name]". The "Pass Hash:" field has a small "show" icon to its right. At the bottom of the form is a green button labeled "Save And Sync".

5. Click **Save And Sync**.
