

Simplesat Integration Setup

You need to provide the Account Key when connecting Simplesat to MSPbots.

Set up the Simplesat integration with the following steps:

1. Find the API Key of your Simplesat account.
 - a. Log in to Simplesat and click **Account Settings** from the top menu.
 - b. Scroll to the bottom of the page and expand the **Account Key** accordion.
 - c. Copy the **Account Key** to the clipboard.
2. Log in to MSPbots and go to [Integrations](#).
3. Search for **Simplesat** and click it.
4. Paste the account key in the **Token** field.

The screenshot shows the Simplesat integration setup interface. At the top, there's a header with the Simplesat logo, a green status message "This request api success", and a play button icon. Below the header, it says "Last success auth : 04/27/2022 13:10 CDT" and "Type : null". The main form area has a label "* Token :" followed by a text input field containing a masked token (a series of dots). To the right of the input field is a small icon. At the bottom of the form is a green button labeled "Save And Sync".

5. Click **Save and Sync**.
