# Acronis Integration Setup

Setting up the Acronis integration with MSPbosts requires the data center URL, client ID, and client secret. Before proceeding with the steps below, ensure that you have administrator access to Acronis and the MSPbots app.

To connect Acronis to MSPbots:

1. Secure the following for your Acronis account.
   - Data Center URL
   - Client ID
   - Client Secret
2. Log in to Acronis as an administrator and create a unique API Key for MSPbots.
   a. Go to **Manage Account**, then navigate to **Settings** > **API Clients**.

   b. Click on **+ Create API client**.
   c. On the Edit API Client pop-up window, type "mspbots" in the **Name** field and click **Done**.

d. Copy the Client ID, Secret, and Data Center URL.

Create API client   ✕

Copy and save the client ID, secret, and data center URL. There is no way to retrieve secret information if you lose it.

Client ID:	ef0c
Secret:	j2v
Data center URL:	https://sg-cloud.acronis.com

Copy

Step 2 of 2   Done

3. Log in to the MSPbots app and navigate to **Integrations** on the menu.
4. On the **Integrations** tab, search for **Acronis** and click it.

| A | Acronis | ⇄ ⑦ ⋯ |

5. Enter the **Data Center URL**, **Client ID,** and **Client Secret** in the corresponding fields.

| A | Acronis | ⇄ ⑦ ⋯ |
